

THE 10TH ENERGY EFFICIENCY FORUM AND EXHIBITION

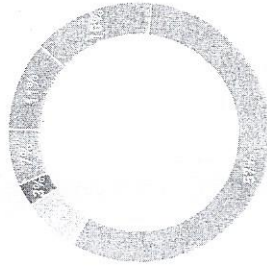

evf@evf.gov.tr | www.evf.gov.tr

20-23 May 2019
 THE ISTANBUL
 LUTFI KIRDAR
 CONVENTION AND
 EXHIBITION CENTER
 (ICEC)

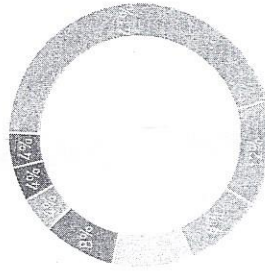

REPUBLIC OF TURKEY
 MINISTRY OF
 ENERGY AND
 NATURAL RESOURCES

VISITORS IN 2018

- Academics
- Sectoral Professionals
- Students
- Representatives of Ministries and Municipalities
- Representatives of Associations and Unions
- Others

PARTICIPANTS IN 2018

- Energy
- Industry
- Banking
- Public Sector
- Associations and Unions
- Communication
- Construction
- Technology

The EVF conferences and exhibition make it Turkey's biggest and most important event in energy efficiency. The event hosts more than 6,500 commercial visitors per year and has become one of the main platforms for industrial dialogue. It is a dynamic event where the most competent Turkish and foreign experts and decision-makers discuss solutions to problems.

In addition, EVF is an ideal stage to present innovation topics which grow dynamically. The developers and users of new technologies get the opportunity to present themselves and their businesses on this platform.

Come to the EVF Forum and Exhibition to exchange information with experts, talk to decision-makers, participate in discussions about the most important issues for the industry, learn about developments, see the most efficient products and applications, and learn about the methods of making your business more efficient, economical and cost-effective.

EXHIBITION THEMES

- Power Generation
- Electric Vehicle Manufacturers
- Energy Storage
- Energy Distribution Companies
- Information and Communication Sector
- Lighting
- Steam Systems
- Lighting Technologies
- Cooling, Heating, Ventilation and Air-conditioning
- Transportation Vehicles
- Research and Development
- Environmental Technologies
- Banks and Financial Institutions
- Electric Motors
- Measurement Equipment
- Industry
- Agriculture
- Construction and Insulation Materials
- Waste
- Project Management and Consultancy
- Public Institutions and Organizations
- Energy Efficiency Consulting Companies
- Automation and Automatic Regulation
- Energy Efficiency Services
- Passive Buildings
- Municipalities
- Universities
- NGOs
- Building Automation Systems

10TH ENERGY EFFICIENCY FORUM AND FAIR
(28-29 March 2019, ISTANBUL)

The 10th Energy Efficiency Forum and Fair (EEFF) that aims at increasing the awareness of energy culture and efficiency in the society will be realized under the coordination of the Ministry of Energy and Natural Resources with the participation of the Minister of Energy and Natural Resources of Turkey at Lutfi Kırdar International Convention and Exhibition Center on 28-29 March 2019, with international high level participation.

In Turkey, as a part of our energy efficiency policy, "National Energy Efficiency Action Plan" (2017-2023) has been put into force, which comprises 55 actions defined in 6 categories including buildings and services, energy, transport, industry and technology, agriculture and horizontal issues. As part of the plan, it is targeted that primary energy consumption in Turkey will be reduced by 14% by 2023. Moreover, it is expected that cumulative energy savings of 23.9 million tons equivalent of petroleum (MTEP) will be achieved through 10.9 billion US Dollar investment by 2023. Hence, Turkey gives utmost importance to energy efficiency policies and its implementation through sustainable approaches in the energy sector.

From this perspective, the Energy Efficiency Forum and Fair, which had been commenced in 2009, attracts many national/international professionals, public and private institutions, civil societies, decision-makers, equipment producers, finance institutions and investors. In this regard, the 10th Energy Efficiency Forum and Fair can be considered as the most important event of the sector in which a large number of national and international companies engaged in energy efficiency activities come together, display their products and establish network with each other.

Within the framework of the forum and the fair; with the participation of experts from the universities, public, private and non-governmental organizations in Turkey and abroad, we aim to realize panels in which studies, developments and future predictions carried out in the field of energy efficiency in Turkey and across the world to be shared; sessions in which studies, developments and practices performed for efficient and effective use of energy at every stage -from the source to the final consumption- and discussion platforms as well. In

this context, EEFF is an important platform where the problems the sector encounters are defined and the solutions are evaluated, which might have an effect on decision makers' approaches in the future.

In this context, we kindly submit for your information, and request you to send the names of your proposed speakers and suggestions for the issues which you think would be beneficial to be proposed for the agenda at the 10th Energy Efficiency Forum to skalayci@yegm.gov.tr until 14 September 2018 and inform the sector representatives who will be willing to participate in our fair from your country by renting a booth through contact with "CEO Organizasyon Reklam Turizm ve İnşaat INC." which organizes our fair.
