The Maintenance Division of ELECTROPRECIZIA SA has an experience of more than 55 years in the field of modernizing the technological and fabrication processes of the electric motors and automotive electric equipment.

- We are doing maintenance and modernization works for machine tools and equipments:
 - lathes,
 - milling machines,
 - grinding machines,
 - die casting machines,
 - plastic moulding machines,
 - machines for wood machining,
 - complex hydraulic and pneumatic equipments,
 - modernization of automation equipments.

- Also we are designing, manufacturing and repair specific machines such as:

- control benches,
- various ovens,
- ventilation systems,
- painting cabins,
- lifting equipments,
- assembling lines, conveyors,
- winding machines,
- pneumatic & hydraulic presses,
- impregnation machines
- various metallic works.

- Execution and modernization of automated fabrication lines.
- Manufacturing of high quality spare parts,
- Remanufacturing of the induction motors with powers from 0.1 kW up to 55 kW.

- Our division has a design team ready to make custom designs of machines using the best parts and components from well-known international suppliers.
- The machines are manufactured in our own shops by high skilled personnel.
