The tools factory of ELECTROPRECIZIA SA, with a tradition of more than 70 years in the field of manufacturing tools and control gauges, is producing a wide range of dies for:

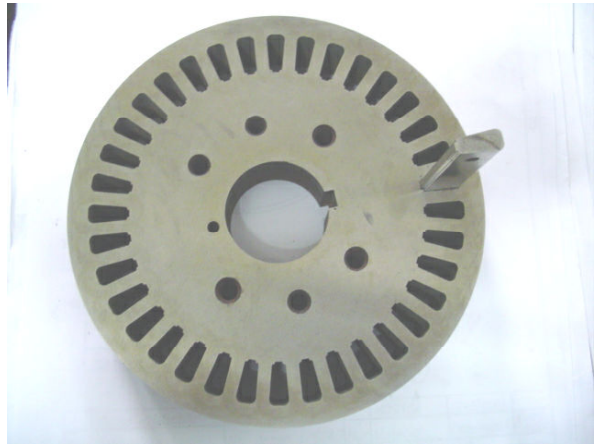

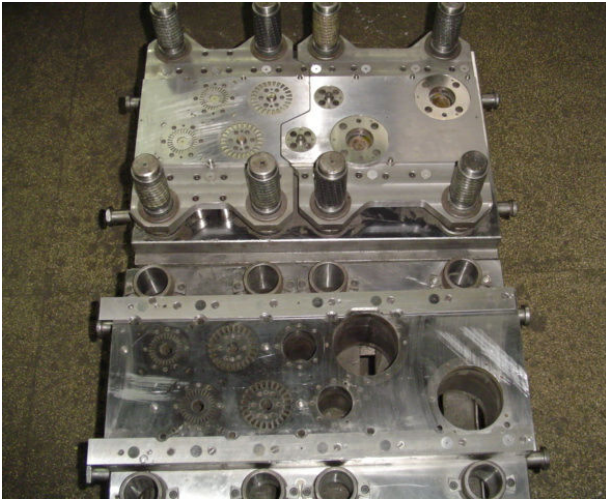

- plastic moulding,
- die casting,
- stamping,
- a great diversity of complex devices and gauges.

In our tools factory we have around 150 machines

- for conventional machining:
 - milling machines
 - lathes
 - grinding machines
 - CNC centres
- for unconventional machining:
 - spark erosion

The high technicality of our staff, the use of the best raw materials purchased from well known companies and very good machines from our inventory allow us to execute even the most complicated tools, control devices and gauges.

Since November 1995 ELECTROPRECIZIA attended the Certificate for the Management of the Quality system according to ISO 9001 standard, accorded by TÜV Management Service GmbH and re-attested by SGS UK Ltd. In January 2007.

Since October 2006, ELECTROPRECIZIA attended the Certificate for the Management of the Quality system according to ISO/TS 16949.

Our tool workshop manufactures also various tools according to the drawings received from customers from all EC countries.
